

Internship Project Report

Prepared by: **Srishti Singh**

Role: Intern

Company/Organization: Unified Mentor

Department: Business Analytics

System for Profitability Optimization and Recommendation Engine

1. Executive Summary

This project focuses on building a Decision Intelligence System to analyze sales and profitability data and generate actionable recommendations for management. The data was cleaned and transformed in Microsoft Excel, and an interactive dashboard was developed in Power BI. A Profit Class was created to categorize records into High Profit and Low Profit based on Profit Margin. Scenario analysis was performed to simulate different business situations and identify strategies to maximize profitability.

2. Introduction

In today's competitive business environment, organizations need data-driven insights to improve profitability and operational efficiency. Decision intelligence combines data analysis, business rules, and visualization to support management decisions.

This project analyzes the Nassau Candy Distribution dataset to identify profitable products, evaluate performance by region and product, and provide recommendations to improve business outcomes.

3. Business Objectives

1. Predict profitable and low-profit products.
 2. Identify key factors affecting profitability.
 3. Generate management recommendations.
 4. Simulate business scenarios.
 5. Develop an interactive Power BI dashboard.
 6. Support data-driven decision-making.
-

4. Project Scope

The project covers:

- Data cleaning and transformation.
- Profitability analysis.
- KPI development.
- Dashboard creation.
- Recommendation generation.
- Scenario analysis.

The project is based on the provided historical dataset and is intended as a proof-of-concept. It does not include integration with live ERP, CRM, or operational systems.

5. Dataset Overview

Dataset Name

Nassau Candy Distribution Dataset

Key Fields Used

- Order Date
- Ship Date
- Region

- Product Name
- Sales
- Units
- Gross Profit
- Profit Margin

Purpose of Dataset

To analyze profitability and operational performance across products and regions.

Dataset preview from Excel showing column headers and sample records.

6. Methodology

The project methodology followed these steps:

1. Data Collection
2. Data Cleaning
3. Creation of Calculated Columns
4. Exploratory Data Analysis
5. Profit Classification

6. Dashboard Development
 7. Scenario Analysis
 8. Recommendations
 9. Report Preparation
-

7. Data Cleaning and Preparation

Data cleaning was performed in Microsoft Excel.

Cleaning Activities

- Removed duplicate records.
- Checked and handled blank values.
- Standardized date and number formats.
- Converted the dataset into an Excel Table.
- Created additional calculated columns.

Calculated Columns Created

Delivery Days

Ship Date minus Order Date.

Profit Margin

Gross Profit divided by Sales.

Profit Class

- Profit Margin $\geq 65\%$ → High Profit
- Profit Margin $< 65\%$ → Low Profit

Recommendation

Generated business suggestions such as:

- Review Pricing
- Reduce Discount
- Maintain Strategy

Excel table showing Delivery Days, Profit Margin, Profit Class, and Recommendation columns.

0.666666667	1.020018982	High Profit	Low

8. Exploratory Data Analysis

Pivot Tables and charts were used to analyze:

- Profit by Region
- Sales by Product
- Profit Class Count
- Monthly Sales Trends

Key Findings

- Most products were highly profitable.
- Some products had lower profit margins.
- Profitability varied across regions.

Pivot Tables.

Row Labels	Sum of Gross Profit
Atlantic	26973.7
Gulf	14700.67
Interior	21282.49
Pacific	30485.94
Grand Total	93442.8

Row Labels	Count of Profit Class
High Profit	10194
Grand Total	10194

Row Labels	Sum of Sales
Everlasting Gobstopper	130
Fizzy Lifting Drinks	78.75
Fun Dip	12
Hair Toffee	76.5
Kazookles	1205.75
Laffy Taffy	53.73
Lickable Wallpaper	7860
Nerds	15
SweeTARTS	61.5
Wonka Bar - Fudge Mallows	24890.4
Wonka Bar - Milk Chocolate	26867.75
Wonka Bar - Nutty Crunch Surprise	23574.95
Wonka Bar - Triple Dazzle Caramel	28485
Wonka Bar - Scrumdiddlyumptious	27874.8
Wonka Gum	597.5
Grand Total	141783.63

9. Profit Classification Logic

To support predictive analysis, records were categorized into two classes:

- High Profit
- Low Profit

Logic Used

If Profit Margin is greater than or equal to 65%, the record is classified as High Profit; otherwise, it is classified as Low Profit.

This classification helps management focus on products and regions requiring improvement.

10. Power BI Dashboard Development

An interactive dashboard was developed in Power BI.

KPIs Included

- Total Sales
- Total Profit
- Profit Margin
- Order Count

Visualizations Used

- Profit by Region
- Top Products by Sales
- Monthly Sales Trend
- Profit Class Distribution
- Recommendation Table

Slicers Added

- Region
- Product Name
- Profit Class
- Order Date

Complete Power BI dashboard.

11. Scenario Analysis

Scenario analysis was performed to evaluate the impact of changes in Sales and Profit Margin.

Sample Scenarios

- Increase Sales by 20%
- Improve Margin to 75%
- Worst Case Scenario

Short Interpretation

Increasing Sales and improving Profit Margin significantly increased Gross Profit. The highest profit was achieved when both Sales and Profit Margin increased together.

Scenario Analysis table.

	A	B	C	D	E
1	Scenario	Sales	Profit Margin	Gross Profit	Result
2	Current Performance	1000	0.65	650	High Profit
3	Increase Sales by 20%	1200	0.65	780	High Profit
4	Increase Sales by 50%	1500	0.65	975	High Profit
5	Improve Margin to 70%	1000	0.7	700	High Profit
6	Improve Margin to 75%	1000	0.75	750	High Profit
7	Reduce Margin to 60%	1000	0.6	600	Low Profit
8	Reduce Margin to 55%	1000	0.55	550	Low Profit
9	Sales Up + Margin Up	1200	0.75	900	High Profit
10	Sales Down by 20%	800	0.65	520	High Profit
11	Worst Case Scenario	800	0.5	400	Low Profit

12. Recommendations

Based on the analysis, the following recommendations were generated:

1. Focus on products with high profit margins.
 2. Review pricing for low-margin products.
 3. Reduce unnecessary discounts.
 4. Prioritize high-performing regions.
 5. Improve operational efficiency.
-

13. SWOT Analysis

Strengths

- Converts data into actionable insights.
- Provides an interactive dashboard.
- Supports automated recommendations.

Weaknesses

- Dependent on data quality.
- Thresholds may require adjustment.

Opportunities

- Can be integrated with ERP systems.
- Can be extended using machine learning.

Threats

- Incorrect data may lead to poor decisions.
 - Market changes may affect relevance.
-

14. Business Impact and Conclusion

The Decision Intelligence System successfully transformed raw transactional data into actionable business insights. The solution identified profitable and low-profit products, generated management recommendations, and demonstrated how scenario analysis can guide pricing, product, and regional decisions. This proof-of-concept can help management improve profitability and operational efficiency.

15. Limitations

- Analysis is based on historical data only.
- Threshold values were selected for academic purposes.
- External market factors were not included.

16. Future Scope

- Integrate machine learning models.
- Connect with real-time business systems.
- Add forecasting and inventory optimization.
- Automate report generation.

17. References

1. Microsoft Excel Documentation.
2. Microsoft Power BI Documentation.
3. Course notes and project guidelines.
4. Business analytics reference materials.

18. Annexures

Annexure A: Raw Dataset Sample

Annexure B: DAX Measures

Total Sales

Total Sales = SUM('My Data'[Sales])

Total Profit

Total Profit = SUM('My Data'[Gross Profit])

Profit Margin

Msr Profit Margin = DIVIDE([Total Profit], [Total Sales], 0)

Order Count

Order Count = COUNTROWS('My Data')

Annexure C: Power BI Dashboard

Annexure D: Scenario Analysis

	A	B	C	D	E
1	Scenario	Sales	Profit Margin	Gross Profit	Result
2	Current Performance	1000	0.65	650	High Profit
3	Increase Sales by 20%	1200	0.65	780	High Profit
4	Increase Sales by 50%	1500	0.65	975	High Profit
5	Improve Margin to 70%	1000	0.7	700	High Profit
6	Improve Margin to 75%	1000	0.75	750	High Profit
7	Reduce Margin to 60%	1000	0.6	600	Low Profit
8	Reduce Margin to 55%	1000	0.55	550	Low Profit
9	Sales Up + Margin Up	1200	0.75	900	High Profit
10	Sales Down by 20%	800	0.65	520	High Profit
11	Worst Case Scenario	800	0.5	400	Low Profit
